### Tenth-Grade Course Offerings

Crossland High School, Maryland

**Topic:** Helping Students Navigate the Path to College

**Practice:** Prepare Students Academically

Crossland High School strives to provide a rigorous, college- and career-ready academic program that prepares all students for postsecondary prospects. The *Tenth-Grade Course Offerings* shows the classes available to tenth-grade students in the traditional comprehensive program and technical academies. The available courses are primarily from the academic core—English, math, social studies, and science—but students may also select from a limited number of electives, such as business education and family and consumer science. Counselors use this course list to explain requirements and options to students and their parents. Schools may find this list useful as they plan a rigorous program that prepares students to be college- and career-ready.
